

COMPANY PROFILE

WHY US

- Competitive pricing policy
- Advanced manufacturing facility
- Skilled team of professionals
- Extensive research and development
- Total quality management
- Timely delivery of all the orders
- Experienced in Engineering Complete, Efficient Systems to meet Customer's Individual Requirements.

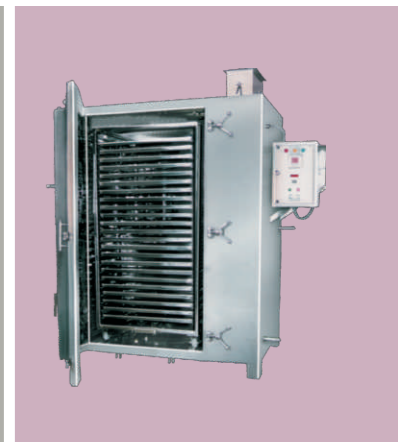

Above all,

Our entire assortment is based on thorough market research and analysis. We have with us a team of research analysts who strive to upgrade our range from time to time as per the latest technological advancements. Moreover, the equipment are fabricated under the strict vigil of our quality control experts and engineers, who make sure that all the finished products are at par with IS & ISI standards.

COMPANY PROFILE

Maxwell Engineers is an leading Manufacturer & Supplier of all type of Chemical Machinery, Pharmaceutical machinery like Pressure Vessels, centrifuge, heat exchangers, storage tanks & all type of Fabrication Works in Gujarat. We are a highly quality conscious firm, which makes us keep no stone unturned when it comes to the quality of our offered range. As a result, we have earned a large client base of reputed clients in the international markets.

We are engaged in the business of providing Heat Extractor Fans, Industrial Heat Extractor Fans, Chemical Processing Plant, All Type of Engineering and Fabrication Works, etc to our esteemed clients. We are backed by a team of extremely skilled professionals, who with their unmatched domain experience cater to our clients efficiently. With the proper know how of the domain, they help us find the most authentic vendors of the required component in the business. They further check them on various quality parameters to ensure that they qualify to the international standards.

Products

- All type of Chemical Machinery, Chemical Equipments, Chemical Process Equipments.
- Pharmaceutical Machinery & Pharmaceutical Equipments
- Chemical Processing Plant
- All Type of Engineering Works
- All Type of Fabrication Works, Heavy Fabrication Work.

Our Sophisticated Infrastructure

Based in Gujarat, we have the best infrastructure in the industry. We keep it equipped with the latest machinery so as to ensure uninterrupted services. The technology savvy nature of our staff helps us in manufacturing and delivering superior quality products. We own a capacious warehouse, where we store our final products in a very hygienic environment. This warehouse is at a safe distance from our manufacturing unit and ensures safe storage and delivery. This is the reason for the high capacity, durability and outstanding quality of our products.

Founded in 1994, we are a noted Manufacturer and Supplier of a variety of Chemical Machinery, Pharmaceutical machinery and Engineering Works. Apart from providing products in superior quality, we also fabricate products as per the clients' specifications. Our products are widely acclaimed for their unique properties, like corrosion, temperature resistance, high tensile strength and more. The same has earned them a large client base in the global market. To ensure that we deliver products in the desired quality and in the committed time frame, our experts work round the clock and complete each order efficiently.

PRODUCT

Pressure Vessels

Vertical Pressure Vessels: Engineered as per the industry standards, our superior range of Vertical Pressure Vessel is highly appreciated by our clients. This pressure vessel is used in a variety of applications in both industry and the private sector. It is a closed container designed to hold gases or liquids at a pressure substantially different from the ambient pressure. The pressure differential is dangerous and many fatal accidents have occurred in the history of pressure vessel development and operation. Manufactured with steel using modern tools, this Vertical Pressure Vessel, designed for safe usage is offered at affordable prices.

Features of Pressure Vessel :

- Rust resistance
- Sturdiness
- High tensile strength
- Dimensional accuracy

High Pressure Vessels: Owing to our impeccable knowledge and experience of this industry, we are manufacturing, exporting and supplying a comprehensive array of High Pressure Vessels. The offered range is designed and manufactured by our experienced professionals utilizing the latest tools and technology with high graded materials as per the set industry norms. To securely tighten the pressure vessels and maintain the pressure inside them, end cap heads are fitted to the cylindrical body. Moreover, we are offering High Pressure Vessels at industry-leading prices in various technical specifications.

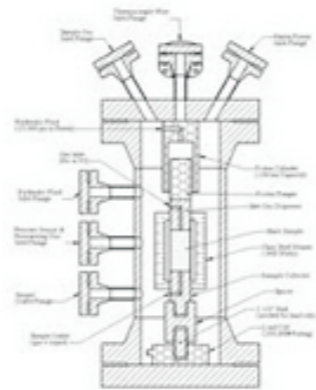

Features High Pressure Vessels::

- Robust construction
- Highly resistant to extreme pressure
- Low maintenance
- Durability

Cross Sectional Pressure Vessels: We are introducing a comprehensive assortment of Cross Sectional Pressure Vessel used in chemical machinery and engineering tasks. These vessels are manufactured from high quality materials, procured from trust-worthy vendors using modern technology under strict supervision of our team experts. Our product array of vessels is highly appreciated in various industrial applications. These vessels are quality tested also by our quality-controllers to ensure optimum performance. We make available the offered range of Cross Sectional Pressure Vessel at reasonable prices.

Features Cross Sectional Pressure Vessels:

- Long service life
- Excellent functionality
- Sturdy construction
- High efficiency

Ribbon Blender

- The container shape and the mixing stirrer give continuous movement resulting in better quality mixing and blending.
- Ribbons designed in such a way so as to provide both radial and linear motion for a complete homogenous mixing.
- Provided with Dust Proof top cover with window.
- Various types of Ribbon Blenders such as Pressure, Double Spiral etc., are available.
- Used in Pharmaceutical, Chemical, Food Processing and Cosmetics industry.

PRODUCT

Storage Tank

Stainless Steel Storage Tanks: With the exceptional talent of our skilled team, we are manufacturing, exporting and supplying a superior range of Stainless Steel Storage Tanks. Manufactured using high grade stainless steel utilizing advanced tools, our range is in line with defined industry standards. Available in different configurations and in circular & rectangular shapes, these tanks are widely used for water storage, chemical storage, gas storage, oil storage. We consistently manufacture Stainless Steel Storage Tanks that meet and exceed our customer's requirements & expectations and offer at affordable prices.

Features of Stainless Steel Storage Tanks :

- Rust resistance
- Sturdiness
- High tensile strength
- Dimensional accuracy

Industrial Tanker: We offer a wide range of tank for various storage capacity, and manufacture as per party order and requirement.

Centrifuge

Centrifuge: We are committed to offer our clients an exceptional assortment of Centrifuge Machines. These machines are widely used in chemical, pharmaceutical and textile industries for separating liquid and solid. Our professional make sure that these Centrifuge Machines are made using optimum grade of materials by employing advanced technology. Compact design, rugged construction and unmatched performance are some of the salient attributes of our machines.

Features of Centrifuge:

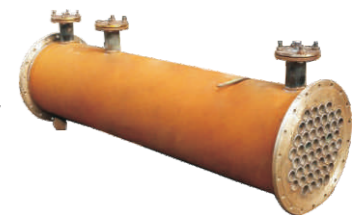

- Abrasion resistant
- Energy saving
- High efficiency
- Less power consumption
- Impressive feeding Density.

Heat Exchangers

Industrial Heat Exchanger: We have come up with a wide range of Industrial Heat Exchanger that is reckoned in the industry for its unmatched quality. This exchanger is manufactured with quality raw materials and is tested on well-defined parameters ahead of delivery to our clients. The offered heat exchanger is used to transfer the heat from one medium to another medium. The Industrial Heat Exchanger is widely used in refrigerators, air conditioners, space heating and natural gas processing. Our clients can avail this range at reasonable prices.

Features of Stainless Steel Storage Tanks :

- Maximum efficiency
- Durable
- Robustness
- Sturdy construction

PRODUCT

Pharmaceutical Reactor

Pharmaceutical Reactor: Since our years of establishment, we are engaged in manufacturing and supplying a superior range of Pharma Reactors. These pharmaceutical reactor are manufactured utilizing the highest grade raw components with cutting-edge technology under the guidance of our technocrats. These equipments are widely used in pharmaceutical and many other industries. We also believe in delivering prompt after-sales services for these pharmaceutical reactors. Clients can avail these Pharma Reactors in various specifications at reasonable prices.

Features of Pharmaceutical Reactor :

- Easy operation
- Sturdy construction
- Corrosion resistance
- Durability

Nutch Filter

Nutch Filter: We offer a different range of Nutch Filter, and manufacture as per party requirement.

Our organization is a reputed manufacturer & supplier of Nutch Filters, that are widely utilized for filtering various, slurry, solutions and other liquids. The offered gamut is created to withstand low vacuum and we can customize the assortment as per the demand of our client. Our firm also provide filter bags and cloths in different sizes.

Customers adore these Nutch Filters for exquisite performance, durability, easy maintenance and cost effectiveness.

Autoclave Processor

- Operate with steam under high pressure to generate the necessary heat.
- Used for day to day sterilization processes and various laboratory applications.
- The most effective and the most efficient Sterilizers of the industry.
- Specially designed for Medical, Clinical, Bacteriological & Research Laboratories, Pharmaceuticals, Fertilizer Plant, Breweries, Soft Drink Mfg. etc.
- Highly customizable, catering to the requirements of the Clients.
- Available in both customizable and standard models.

Chemical Reactor

Chemical Reactor: To attain our primary goal of fetching complete contentment for our respectable clients from the industry, we bring forth this superior quality assortment of Chemical Reactor. The offered chemical reactors is manufactured by our technical engineers using superior grade stainless & mild steel with rubber brick lining. This chemical reactor finds extensive applications in various industries like chemical, pharma, bulk drugs, pesticides, herbal, dyes and others. Our range of Chemical Reactor is made available at nominal prices for our esteemed customers.

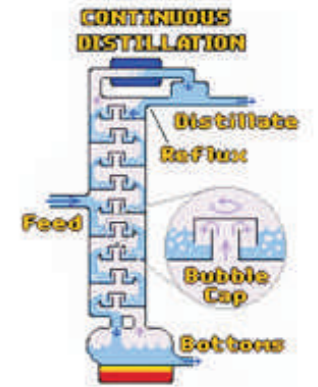

PRODUCT

Distillation Column

Distillation Column: For meeting the variegated demands of the clients, we have come up with a wide range of Distillation Column. This is used in various industries for distillation process such as solvent extraction, membrane separation or adsorption process. The offered column is specifically designed and manufactured for the separation of liquid or vapor mixture of two or more substances into its component. In addition to this, we provide this Distillation Column in varied designs, sizes and specifications as per the exact requirements of our esteemed clients.

Features of Distillation Column :

- Sturdy construction
- Easy maintenance
- Corrosion resistance
- Perfect Finish

Industrial Heat Extractor Fans

Industrial Heat Extractor Fans: With a dream to scalp out a niche for ourselves in markets of the day, we bring forth a quality-assortment of Industrial Heat Extractor Fans. These heavy duty industrial fans can be used for general plant ventilation, clearing of smoke and fumes as well as summertime cooling. The offered fans are manufactured using high grade components with cutting-edge technology. Our clients can avail this range of Industrial Heat Extractor Fans at unbeatable prices.

Features of Industrial Heat Extractor Fans:

- Robustness
- Corrosion resistance
- Low maintenance
- Precised engineering

Vacuum Tray Dryer

Vacuum Tray Dryer (VTD) is suitable for drying of thermal sensitive materials easily resolved, polymerized or deteriorated under higher temperature. Sterilization can be conducted prior to the drying process, during which no matter is allowed to enter the product. Static vacuum dryer eliminates the configuration damage of the drying materials therefore widely used in pharmaceutical, chemicals and foodstuff etc.

Steam Tray Dryer

Tray Dryers are useful in Pharmaceutical, Chemical, Dyestuffs, Food and Automobile Industries. A Tray Dryer is an enclosed, insulated housing in which Trays are placed on angled rack. Material to be dried is placed on the trays. Heating media is Hot Air, and heat transfer is direct from Hot gases or Electric heaters to Wet raw material with help of specially designed Air circulation fan arrangement to maintain the constant temperature in the dryer and ensures uniform circulation of hot air. This will Enhance the Drying of raw material & reduces the Drying time Drastically.
